

TAQ Department Wise Results

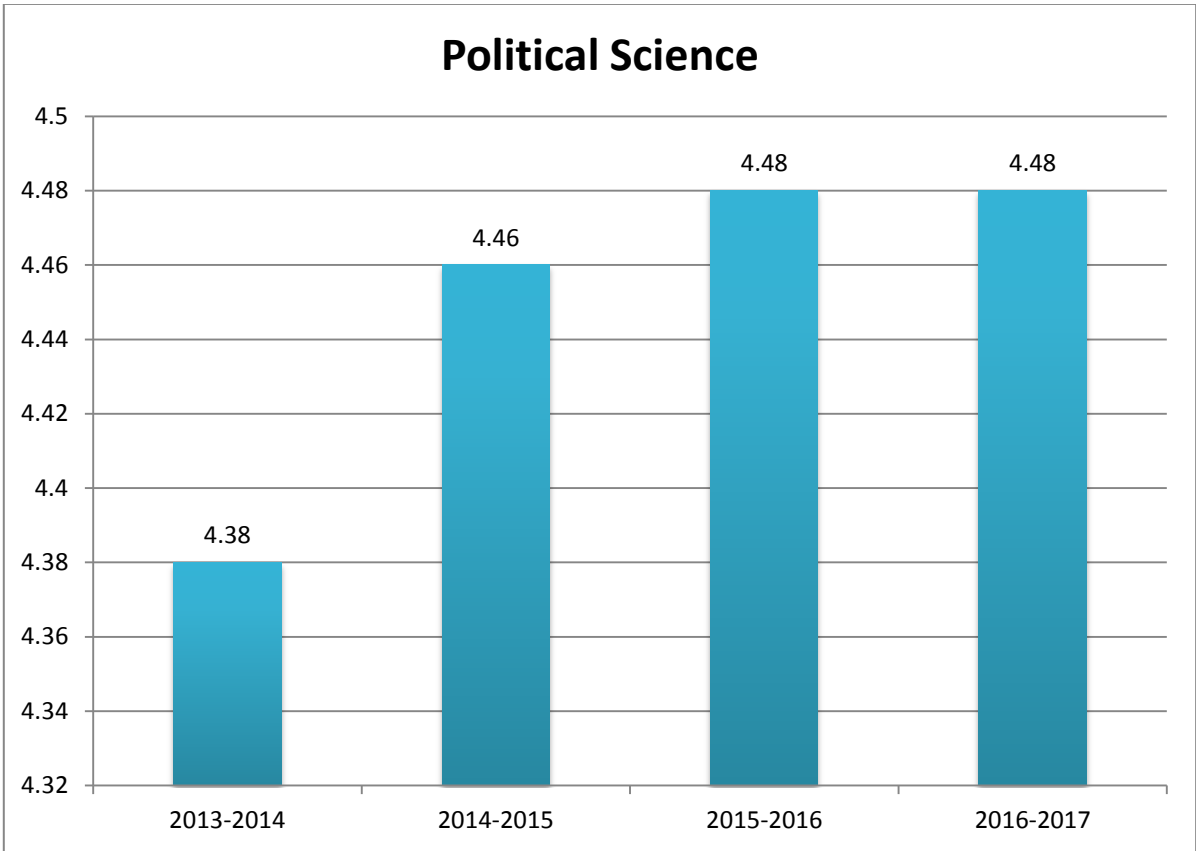

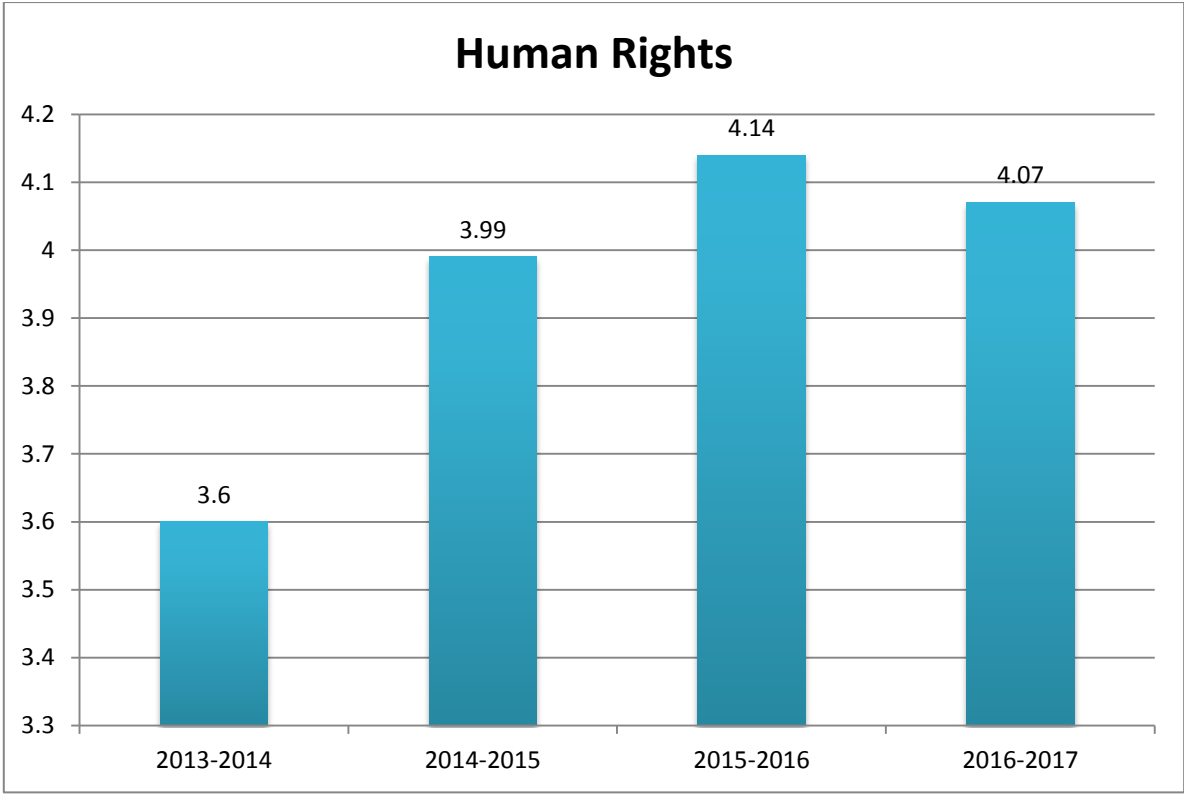

From 2013-14 to 2016-17

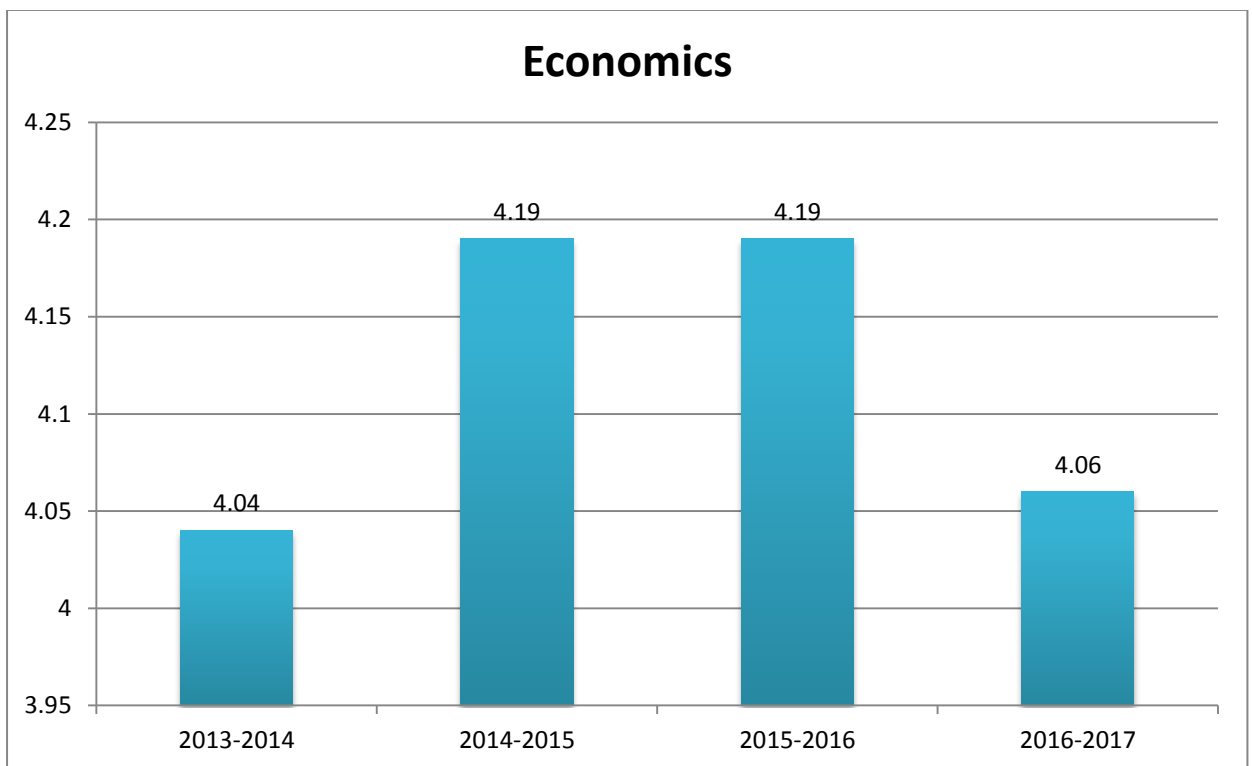

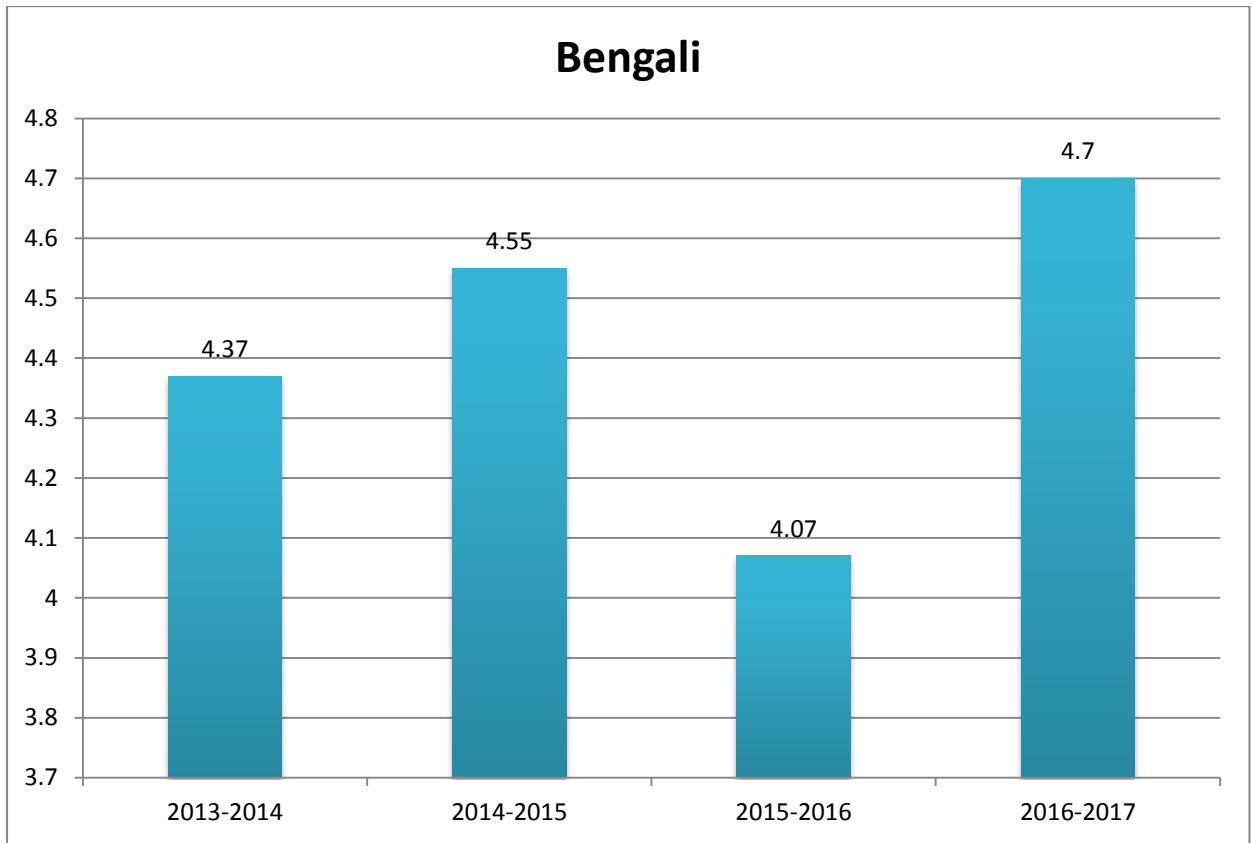

Up to 2012-2013 evaluation of teaching efficiency was obtained in hard copy and since 2013-2014 this has been performed by students online. Analysis has been enabled with greater ease in this mode.

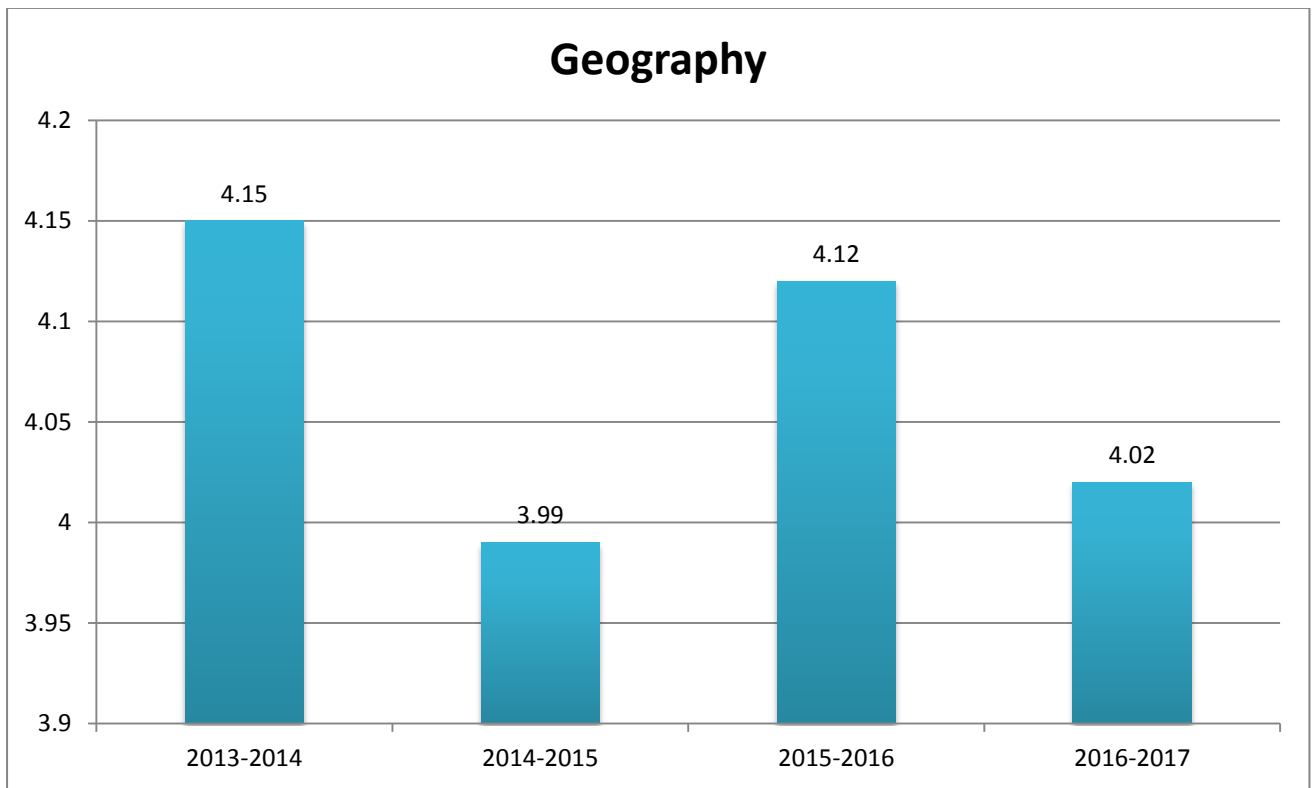

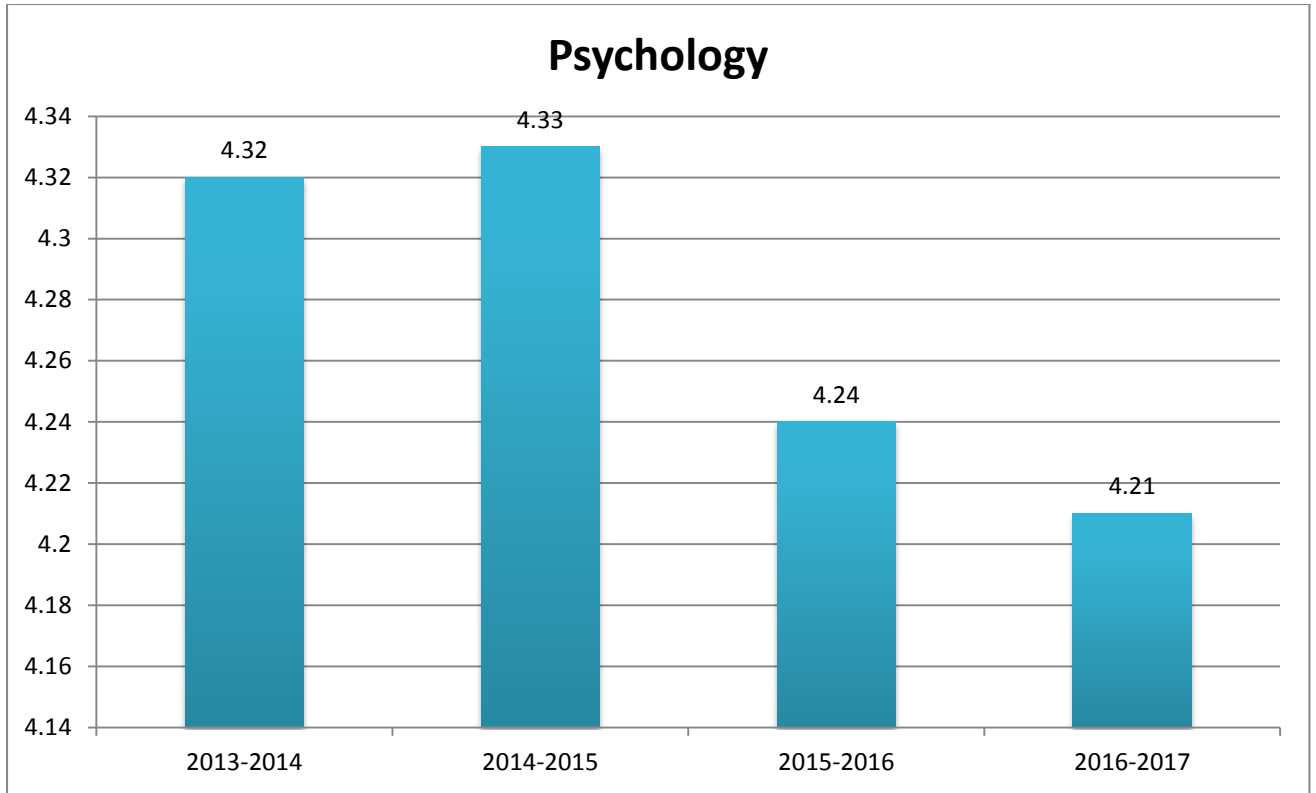

The graphical representation of the department-wise TAQ may not be clear indicators of trends of feedback of students towards teachers of a department as the sample size is relatively small and magnification of results is depicted. The range of scale being between 3.3 and 4.7 more fluctuations in the bar graphs are visible.

Action taken

The TAQ'S are shown with individual teachers and areas of weakness along with possibilities for improvement discussed with them. Comparison for each teacher with previous year's individual areas and TAQ is made, should there be a decline in overall teaching efficiency score.
